Screen Inventory

Product 3 — Elevator Pitch Live

by AutomagiKal · March 2026 · Confidential

About this document

This document defines every screen in the Elevator Pitch Live product (Product 3), in the order a user encounters them. For each screen it specifies the screen name, URL route, purpose, all information and content displayed, navigation elements, and every primary and secondary action available.

This document is a companion to the Pitch Deck Analyser and Elevator Pitch Script Check screen inventories, the User Flow diagram, and the Technical Specification. Screens 01–05 (Landing Page through Dashboard) are shared across all products and documented in full in the Pitch Deck Analyser Screen Inventory. They are summarised here with Product 3 specific differences only.

Product summary

Product name	Elevator Pitch Live
Modules	Module 2 (M2) × 2 cycles + Module 3 (M3) × 3 cycles — interleaved
What it does	Combines written script coaching with live delivery practice. The user can submit their script for element-by-element feedback (M2), record themselves delivering their pitch live in the browser (M3), and interleave these sessions in any order guided by what needs improving. The product is built around the principle: know what you are going to say before you practise saying it — hence the strong recommendation to start with the script session.
Total sessions	5 sessions total: 2 script (M2) + 3 live recording (M3)
AI engine	Claude Sonnet 4.6 (script analysis and coaching synthesis) · Gemini (live delivery and body language analysis)
M2 input formats	PDF · DOCX · DOC · TXT · MD · Keynote (.key) · plain text paste
M3 recording	In-browser · video or audio · maximum 3 minutes · no transcript in this product
Total screens	14 distinct screens (Screens 01–05 shared, Screens 06–14 product-specific)
Route prefix	/dashboard/elevator-pitch-live

How interleaving works in this product

Unlike Products 1 and 2 where sessions always run in a fixed sequence, Product 3 allows the user to choose which type of session to run at each step. The platform strongly recommends starting with a script session before going live — but this is a recommendation, not a hard constraint. After each session the user returns to the module entry screen, sees their updated counters, and chooses their next step.

Example valid journeys through Product 3:

Journey	Session sequence
Recommended	Script 1 → Live 1 → Script 2 → Live 2 → Live 3
Script first, then all live	Script 1 → Script 2 → Live 1 → Live 2 → Live 3
Live first (not recommended but allowed)	Live 1 → Script 1 → Live 2 → Script 2 → Live 3
All live, then script	Live 1 → Live 2 → Live 3 → Script 1 → Script 2

Screen map — order of screens

#	Screen name	Route	Notes
01	Landing Page	/	Shared
02	Create Account	/register	Shared
03	Verify Email	/verify-email	Shared
04	Browse Products & Pricing	/pricing	Shared — Product 3 card shown
05	Dashboard	/dashboard	Shared — M2 and M3 counters both shown
06	Module Entry — Choose session type	/dashboard/elevator-pitch-live/new	Core to this product — script vs live choice
07	Script Session — Input & Name	/dashboard/elevator-pitch-live/script/new	M2 entry — same flow as Product 2 Screen 06
08	Script Analysis in Progress	/dashboard/elevator-pitch-live/script/analysing	Processing state for M2
09	Script Feedback Report	/dashboard/elevator-pitch-live/script/session/[id]	M2 report — same structure as Product 2 Screen 08
10	Live Recording — Setup & Name	/dashboard/elevator-pitch-live/live/new	M3 entry — mode selection and naming
11	Live Recording — In Progress	/dashboard/elevator-pitch-live/live/recording	Active recording state
12	Live Recording — Review & Submit	/dashboard/elevator-pitch-live/live/review	Playback and submit or re-record
13	Live Delivery Feedback Report	/dashboard/elevator-pitch-live/live/session/[id]	M3 report — Gemini + Claude output
14	Add-on & Upsell	/dashboard/elevator-pitch-live/upgrade	Shown when any counter reaches 0

Screens 01–05 — Shared platform screens

Documented in full in the Pitch Deck Analyser Screen Inventory. Product 3 specific differences are noted below.

Screen	Product 3 specific difference
01 Landing Page	No change.
02 Create Account	No change.
03 Verify Email	No change.
04 Browse Products & Pricing	The Elevator Pitch Live card describes both the script and live components. Accepted input formats for the script sessions (including Keynote) are listed. The live recording capability (audio or video, max 3 min) is called out as a key differentiator. The card should communicate the interleaved, coaching-journey nature of this product.
05 Dashboard	The entitlement panel shows two separate counters: Script sessions (M2) — X used / Y remaining / 2 purchased. Live recording sessions (M3) — X used / Y remaining / 3 purchased. The "Start session" CTA routes to /dashboard/elevator-pitch-live/new (Screen 06 — the choice screen), not directly to a module. Suggested next step is contextual: if no sessions used yet, recommends starting with script. If script sessions used and delivery low, recommends live. If live sessions used, shows score comparison.

Screen 06 Module Entry — Choose Session Type</dashboard/elevator-pitch-live/new>**PURPOSE****What this screen does**

- The central hub for Product 3. The user returns to this screen after every completed session.
- Presents both session types — script check (M2) and live recording (M3) — and strongly directs the user toward the script session before going live.
- Shows live counters for both M2 and M3 so the user always knows what they have used and what remains.
- The platform's coaching logic is surfaced here: know what you are going to say before you practise saying it.

PAGE STRUCTURE & CONTENT**Page heading**

Elevator Pitch Live

Session counters panel

- Two counter cards displayed side by side:
 - Script sessions — M2: [X] used · [Y] remaining · [2] purchased
 - Live recording sessions — M3: [X] used · [Y] remaining · [3] purchased
- Progress bars showing used vs total for each
- Counters update in real time after every session — this screen always reflects the current state

Coaching recommendation callout

- Displayed prominently when the user has not yet used any M2 sessions
- Heading: "Start with your script"
- Body: "Before you record yourself live, sharpen what you're going to say. Run your script through the script coach first — you'll get feedback on structure, flow, and your key message. Then practise delivering a pitch you've already refined."
- This callout is visually distinct — coloured background panel, not dismissible on the first visit
- On subsequent visits (after at least one M2 session used), the callout is replaced by a contextual suggestion based on the user's latest scores

Primary CTA — Script session

- Large, full-width button — visually dominant
- Label: "Check my script first" (if no M2 sessions used yet) OR "Submit another script" (if M2 sessions remain)
- Sub-label: "[Y] script sessions remaining"
- Disabled with "No sessions remaining" state and link to upgrade if M2 counter is at 0
- Routes to: Screen 07 — Script Session Input & Name

Secondary CTA — Live recording

- Smaller button — visually subordinate to the primary CTA
- Label: "I'm ready to record live"
- Sub-label: "[Y] live sessions remaining"
- Accompanied by a short note: "Have you already refined your script? Go ahead and record."
- Disabled with upgrade link if M3 counter is at 0

Recent sessions for this product	• Routes to: Screen 10 — Live Recording Setup & Name • Last 3 sessions across M2 and M3 for this product, showing: – Session type (Script or Live) with icon – Session name – Date – Overall score – View report link • Allows the user to review previous feedback before deciding which session type to run next
Contextual next-step suggestion	• After at least one session of each type has been completed, replaces the coaching callout • Examples: – "Your delivery score was lower than your script score. Consider another live session to practise pacing and confidence." – "You've improved your delivery significantly. Run a final script check to make sure your content is as strong as your delivery." – "You've used all your script sessions. Use your remaining live sessions to practise the version you've refined."
Progress summary (after 2+ sessions)	• Mini chart or stat panel showing: – Highest script score across M2 sessions – Highest delivery score across M3 sessions – Trend: improving / plateauing / declining
ACTIONS	
Primary action	• Check my script first / Submit another script → Screen 07 (Script Session Input & Name)
Secondary action	• I'm ready to record live → Screen 10 (Live Recording Setup & Name)
Other actions	• View report (from recent sessions list) → relevant session report screen • Session History → /dashboard/history • Back to Dashboard → /dashboard • Add more sessions (if either counter at 0) → Screen 14 (Add-on & Upsell)
NOTES & RULES	
Rules	• Both CTAs are available regardless of session history — the platform recommends but does not enforce the order. • If both M2 and M3 counters are at 0, both CTAs are replaced with a single "Add more sessions" button routing to Screen 14. • If only one counter is at 0, only that CTA is disabled. The other remains active. • The coaching callout is shown on every visit when M2 counter has not been used, with the same message. It does not auto-dismiss.

Screen 07 Script Session — Input & Name

/dashboard/elevator-pitch-live/script/new

PURPOSE

What this screen does	• Entry screen for a script (M2) session within Product 3. • Functionally identical to Screen 06 of the Elevator Pitch Script Check (Product 2). Full specification is documented there. • Product 3 specific differences are noted below.
-----------------------	--

PRODUCT 3 DIFFERENCES VS PRODUCT 2 SCREEN 06

Back navigation	• "Back" returns to Screen 06 (Module Entry — Choose Session Type), not to the main dashboard • Breadcrumb: Elevator Pitch Live → Choose session → Script session
Cycle indicator	• Shows M2 session count within this product: "Script session [X] of 2" • Not a global counter — specific to M2 within this product journey
Previous session reminder	• If a previous M3 live session exists within this product, the reminder panel shows: – Your most recent live delivery score – Your lowest-scoring delivery dimension (e.g. "Pacing was your weakest area") – Prompt: "Use this session to sharpen the script areas that affected your delivery." • If no M3 session exists yet, the standard Cycle 1 state is shown with no prior M3 context
Input formats	• PDF · DOCX · DOC · TXT · MD · Keynote (.key) · plain text paste • Keynote note on .key file selection: "We'll extract all text from your slides and speaker notes for analysis."
Submit button label	"Analyse Script" — same as Product 2

ACTIONS

Primary action	• Analyse Script → Screen 08 (Script Analysis in Progress)
Secondary actions	• Back → Screen 06 (Module Entry) • Remove uploaded file • Switch input tab (upload / paste) • Collapse / expand framework panel

Screen 08 Script Analysis in Progress

/dashboard/elevator-pitch-live/script/analysing

PURPOSE

What this screen does	• Processing state while Claude analyses the submitted script. • Functionally identical to Screen 07 of the Elevator Pitch Script Check (Product 2). • On completion, navigates to Screen 09 (Script Feedback Report).
-----------------------	--

	On error, offers retry. If user navigates away, analysis continues in background.
PRODUCT 3 DIFFERENCES	
Back navigation on completion	After report is generated, the "Return to Dashboard" option on this screen routes to Screen 06 (Module Entry — Choose Session Type) rather than the main dashboard, keeping the user in the Product 3 journey.
Status messages	- Same rotating messages as Product 2 Screen 07, plus: "Noting areas that could affect your live delivery..."
ACTIONS	
Primary action (error state only)	Try again → re-submits without consuming an additional session use
Secondary action	Return to module entry → Screen 06 (analysis continues in background)

Screen 09 Script Feedback Report

/dashboard/elevator-pitch-live/script/session/[id]

PURPOSE	
What this screen does	- Displays the full AI feedback report for a completed M2 (script) session within Product 3. - Structurally identical to Screen 08 of the Elevator Pitch Script Check (Product 2). Full specification is documented there. - Product 3 specific differences are noted below.
PRODUCT 3 DIFFERENCES VS PRODUCT 2 SCREEN 08	
Delivery link panel	- An additional panel appears at the bottom of the report — not present in Product 2: - Heading: "Ready to practise this live?" - Body: "You've refined your script. Now record yourself delivering it and see how you come across." - CTA: "Record a live pitch now" → Screen 10 (Live Recording Setup & Name) — shown only if M3 sessions remain - If M3 counter is at 0: "You've used all your live sessions. Add more to continue." → Screen 14
CTA label changes	"Start Cycle 2" is replaced by "Submit another script" — clearer language for the interleaved journey "Compare sessions" compares M2 sessions only — not M2 vs M3
Back navigation	"Back" and breadcrumb return to Screen 06 (Module Entry — Choose Session Type)
Score context	- If an M3 session exists within this product, a small reference panel shows: - Most recent live delivery score - Note: "Your delivery score was [X]. Improving your script structure could lift your delivery — pacing and confidence often follow clarity."

ACTIONS	
Primary actions	• Save session → saves to account history • Download PDF → branded PDF of full report
Secondary actions	• Record a live pitch now → Screen 10 (if M3 sessions remain) • Submit another script → Screen 07 (if M2 sessions remain) • Edit session name • Share report → shareable link • Add notes • Back → Screen 06 (Module Entry) • Session History → /dashboard/history • Delete session → confirmation dialog

Screen 10 Live Recording — Setup & Name</dashboard/elevator-pitch-live/live/new>

PURPOSE	
What this screen does	- Entry screen for a live recording (M3) session within Product 3. - User names the session, selects recording mode (video or audio), grants browser permissions, and confirms they are ready to record. - This screen sets up everything before the recording starts. The actual recording happens on Screen 11.
PAGE STRUCTURE & CONTENT	
Page heading	Live Elevator Pitch
Session counter	- Heading: Live recording sessions "Session [X] of 3 · [Y] remaining" - If this is session 3 of 3: "This is your final live session"
Script reminder panel	- If an M2 session exists within this product: - Shows the session name and overall score of the most recent script session "Your top priority actions from your script session were: [1], [2], [3]" "Keep these in mind as you record." - Link: "Review your full script report" → Screen 09 (Script Feedback Report) - If no M2 session exists yet: - Yellow callout: "You haven't checked your script yet. We strongly recommend running a script session before recording live — it'll give you a much stronger base to work from." - Link: "Check my script first" → Screen 07 - Link below: "Continue to record anyway"
Session name field	- Label: Name this session - Placeholder: e.g. "Live pitch — attempt 1" or "After script revision" - Required before recording can start - Pre-populated with "Live Pitch [date]" - Maximum 80 characters
Recording mode selector	- Two clearly labelled options displayed as cards or large radio buttons: - Video — records camera and microphone. Enables body language analysis (eye contact, posture, gestures) in addition to vocal delivery feedback. Recommended. - Audio only — records microphone only. Enables vocal delivery feedback. Use this if camera is unavailable or preferred. "Video" is pre-selected by default with a "Recommended" label - Video mode note: "Your recording is stored securely in your account. It is never shared without your permission."
Permission instructions	- Instruction panel below the mode selector: - Video mode: "Click Start recording — your browser will ask for camera and microphone access. Allow both to continue." - Audio mode: "Click Start recording — your browser will ask for microphone access. Allow it to continue." - Troubleshooting link: "Having trouble with permissions?" → help article

	• If permissions were previously denied, a warning is shown: "Your browser has blocked camera/microphone access. You'll need to reset permissions in your browser settings." with instructions.
What you'll be evaluated on	• Brief summary of what the live session analyses — helps user prepare: – Vocal delivery: pacing, clarity, energy, confidence – Body language (video mode only): eye contact, posture, gesture – 3 personalised coaching drills based on your weakest dimensions • Maximum recording time: 3 minutes • A countdown timer will appear during recording. You'll be warned at 2 min 30 sec.
Previous live session reference (session 2 and 3 only)	• If a previous M3 session exists within this product: – Most recent live session score – Lowest-scoring dimension from that session – "Focus on [dimension] in this session."
ACTIONS	
Primary action	• Start recording → requests browser permissions → if granted, navigates to Screen 11 (Live Recording In Progress)
Secondary actions	• Check my script first → Screen 07 (if M2 sessions remain — shown only when no M2 session has been completed) • Review script report → Screen 09 (if M2 session exists) • Back → Screen 06 (Module Entry — Choose Session Type) • Troubleshooting help link → help article
NOTES & RULES	
Rules	• A session use is not consumed until the recording is submitted for analysis on Screen 12. Abandoning on this screen or Screen 11 consumes no use. • If the browser denies permissions, the user cannot proceed to Screen 11. The screen shows clear instructions for resetting permissions. • Audio-only mode is always available as a fallback regardless of camera availability. • The session name entered here is carried through to Screen 11 and 12 and pre-populated in the report on Screen 13.

Screen 11 Live Recording — In Progress</dashboard/elevator-pitch-live/live/recording>

PURPOSE	
What this screen does	- The active recording screen. The user is delivering their pitch live. - This screen is minimal by design — nothing should distract from the delivery. - Provides the timer, recording controls, and a live preview (video mode only).
PAGE STRUCTURE & CONTENT	
Session name	Session name displayed at the top — read-only reminder of which session this is
Live camera preview (video mode)	- Large preview window showing the user's own camera feed - Muted — no audio feedback to prevent echo - Preview framing guide: a face-outline overlay helps the user centre themselves - Preview positioned so the user can see themselves without looking away from the camera
Audio mode indicator (audio only)	- Waveform visualiser showing microphone input in real time - Confirms the microphone is picking up audio - No camera preview
Recording status indicator	Pulsing red dot and "REC" label — clearly indicates recording is active
Timer display	- Elapsed time: large numerals e.g. 0:47 - Remaining time: shown alongside e.g. "2:13 remaining" - At 2:30 — warning shown: "30 seconds remaining" (amber colour) - At 3:00 — recording stops automatically
Minimal interface principle	- No navigation bar, no sidebar, no distracting elements - Only the preview, timer, and stop button are visible during recording - Full-screen mode available on desktop
Auto-stop behaviour	- At exactly 3 minutes, recording stops automatically - Screen transitions to Screen 12 (Review & Submit) immediately - A brief message: "3-minute limit reached. Your recording has been saved."
ACTIONS	
Primary action	Stop recording → stops recording and navigates to Screen 12 (Review & Submit)
Secondary action	Cancel and go back → confirmation dialog: "Are you sure? Your recording will be lost." → if confirmed, returns to Screen 10, no use consumed
NOTES & RULES	

Rules	• Navigation away from this screen during recording triggers a browser warning: "You have an active recording. Leaving this page will discard your recording." • No use is consumed if the user cancels or navigates away before submitting on Screen 12. • Recording data is stored in browser memory only during this screen. It is uploaded to cloud storage on submission from Screen 12. • If the browser tab loses focus (user switches tab or app), a gentle overlay appears: "Recording is still active — come back to stop it."
-------	--

Screen 12 Live Recording — Review & Submit

/dashboard/elevator-pitch-live/live/review

PURPOSE	
What this screen does	• Shown immediately after the recording stops — either at the 3-minute limit or when the user stops manually. • User reviews their recording before committing to analysis. They can submit or delete and start again. • No transcript is collected in this product. Submission sends the recording directly for analysis. • A session use is consumed on submission — not before.
PAGE STRUCTURE & CONTENT	
Page heading	Review your recording
Playback player	• Full-featured video or audio player • Play / pause / scrub controls • Recording duration displayed: e.g. "1 min 47 sec" • Volume control (audio and video modes) • For video: option to view fullscreen • Autoplay on screen load — user immediately hears and sees their recording
Recording details	• Session name (as entered on Screen 10) • Recording mode: Video or Audio • Duration: [X] min [Y] sec • Date and time recorded
Decision prompt	• Heading: "Happy with this recording?" • Body: "Submit it for coaching feedback, or delete it and start again. Deleting won't use one of your sessions." • This framing makes it completely safe to re-record without penalty
What happens next panel	• Brief description of the analysis that will follow on submission: – Vocal delivery: pacing, clarity, energy, confidence – Body language (video mode only): eye contact, posture, gesture – 3 personalised coaching drills • "Analysis takes about 45 seconds."
No transcript field	• There is no transcript input field on this screen.

	• If transcript capture is added to a future version of this product, it would appear here. • Note for developers: the transcript field visible in the technical specification (LEP-TRN-01) is not surfaced in Product 3. It may be surfaced in Product 4 (Pitch Deck Live) or a future product version.
ACTIONS	
Primary action	• Submit for analysis → uploads recording to cloud storage → navigates to Screen 13 (Analysis in Progress) → consumes 1 M3 session use
Secondary action	• Delete and re-record → confirmation dialog: "Delete this recording and start again? No session will be used." → if confirmed, returns to Screen 11 (In Progress), no use consumed
Other actions	• Back to setup → Screen 10 (deletes the recording, no use consumed)
NOTES & RULES	
Rules	• The user can re-record as many times as they need before submitting. Re-recording does not consume a session use. • A session use is consumed only when Submit for analysis is clicked and the upload to cloud storage begins successfully. • If the upload fails, the session use is not consumed and the user is shown an error with a retry option. • There is no limit on the number of re-record attempts on a single session visit.

Screen 13Live Delivery Feedback Report

/dashboard/elevator-pitch-live/live/session/[id]

PURPOSE	
What this screen does	- Displays the full AI coaching report for a completed M3 (live recording) session. - Feedback is generated by Gemini (delivery and body language analysis) synthesised by Claude (coaching narrative, drills, and report writing). - The most detailed and personal feedback in the product — specific to how the user came across in this recording.
PAGE STRUCTURE & CONTENT	
Report header	- Session name (editable inline) - Module: Live Elevator Pitch - Date and time of recording and analysis - Recording mode: Video or Audio - Recording duration: [X] min [Y] sec - Session counter: Live session [X] of 3 - Overall delivery score: large numeral (0–100), colour-coded, with label e.g. "Strong presence" / "Building confidence" / "Needs practice"
Executive summary	2–3 sentences summarising the overall delivery impression - Specific to this recording — not generic - Identifies the standout strength and the most important thing to work on
Strengths panel	- Heading: What is working - Minimum 2 specific strengths observed in this recording - Each strength: 1–2 sentences, specific and evidence-based - Visually distinct — green-accented panel
Priority coaching actions	- Heading: Your top 3 actions before your next recording - Numbered list 1–3, ordered by impact - Each action is specific, immediately actionable, and references the recording - Prominent coloured panel
Vocal delivery section	- Heading: Vocal delivery - Four dimensions, each scored 0–100 with colour-coded bar: - Pacing — are you speaking too fast, too slow, or well-timed? - Clarity — how clearly are your words landing? - Energy — does your voice convey engagement and enthusiasm? - Confidence — does your delivery project conviction? - Per dimension: score + 2–3 specific sentences of feedback - Score delta badge (sessions 2 and 3 only): e.g. "+8 from last session"
Body language section (video mode only)	- Heading: Body language - Note shown in audio mode: "Body language analysis is available in video mode. Consider switching to video in your next session."

	- Three dimensions, each scored 0–100 with colour-coded bar (video mode only): - Eye contact — are you looking at the camera (your audience)? - Posture — are you presenting with open, confident body language? - Gesture — are your hand gestures supporting or distracting from your message? - Per dimension: score + 2–3 specific sentences of feedback - Score delta badge (sessions 2 and 3 only)
Coaching drills panel	- Heading: Practice drills for your next session 3 personalised coaching drills — targeted at the lowest-scoring dimensions - Each drill: - Drill name and target dimension (e.g. "Mirror drill — for eye contact") - Step-by-step instructions (2–4 steps) - Why this helps — brief explanation linking to the feedback - Not generic — the drills are generated based on this specific session's scores
Script connection panel	- Shown only if an M2 session exists within this product - Heading: Script vs delivery - Side-by-side comparison of the most recent M2 script score and this M3 delivery score - Observation: e.g. "Your script structure is strong but your delivery confidence is lower — the content is there, now it's about how you say it." - CTA: "Run another script session" if M2 sessions remain, to address any content gaps identified
Recording playback	- The user's own recording is available for playback directly within the report - Video player (video mode) or audio player (audio mode) - Allows the user to watch or listen back alongside the feedback - Note: "Watching yourself back is one of the most effective ways to improve. It's uncomfortable — do it anyway."
Session comparison (sessions 2 and 3)	- Available when more than one M3 session exists within this product - Button: "Compare with previous session" → routes to a comparison view - Shows overall score delta and per-dimension score changes
Notes field	- Plain text, max 1,000 characters - Label: Add notes to this session - Saves without re-running analysis
ACTIONS	
Primary actions	Save session → saves to account history with recording, scores, and feedback Download PDF → branded PDF of full coaching report (no video — report only)

Secondary actions	• Play back recording → launches player within the report • Record another live pitch → Screen 10 (if M3 sessions remain) • Run a script session → Screen 07 (if M2 sessions remain) • Compare with previous session → session comparison view (if 2+ M3 sessions) • Edit session name → inline edit • Share report → shareable link • Add notes → focuses notes field • Back → Screen 06 (Module Entry — Choose Session Type) • Session History → /dashboard/history • Delete session → confirmation dialog
NOTES & RULES	
Rules	• Gemini analyses the audio and video to generate the raw delivery and body language scores. Claude synthesises this output into the coaching narrative, drill generation, and report writing. • The report is saved to the user account automatically on generation. • Recording playback within the report uses the securely stored cloud copy — not the local browser recording. • The PDF download contains the full text report but not the video recording. A link back to the platform is included for playback. • Score delta badges compare this session against the immediately preceding M3 session within this product — not against M2 sessions.

Screen 14 Add-on & Upsell

/dashboard/elevator-pitch-live/upgrade

PURPOSE	
What this screen does	• Shown when any counter within Product 3 reaches 0 and the user attempts to start a new session of that type. • Also accessible via "Add more sessions" CTAs on the dashboard and report screens. • Handles both M2 and M3 counter exhaustion — the screen adapts to show which type has run out.
PAGE STRUCTURE & CONTENT	
Context message	• If M2 counter is at 0: "You've used all your script sessions" • If M3 counter is at 0: "You've used all your live recording sessions" • If both are at 0: "You've completed all your Elevator Pitch Live sessions" • Body: progress summary — e.g. "Your script score improved from [X] to [Y]. Your best delivery score was [Z]."
Summary of completed sessions	• Mini session history for this product: last 3 sessions across M2 and M3 • Shows session type, name, date, and score for each
Add-on options	• Add 2 more script sessions (M2) — price · CTA: Add script sessions (if M2 at 0)

	• Add 2 more live sessions (M3) — price · CTA: Add live sessions (if M3 at 0) • Add both — bundled option if both counters are at 0 • Discounted pricing noted: "Discounted for existing clients"
Upgrade options panel	• Heading: Ready for the next level? • Relevant upgrade path: Pitch Deck Live (Product 4) — combines pitch deck analysis with live full presentation recording • Master Pitch Analyser (Product 5) — adds pitch deck analysis alongside your script coaching • Per card: product name, what is added, price, CTA: Upgrade
ACTIONS	
Primary action	• Add sessions → payment flow → counters updated → Screen 06 (Module Entry)
Secondary actions	• Upgrade to Pitch Deck Live → payment flow • Upgrade to Master Pitch Analyser → payment flow • Back to Module Entry (Screen 06) — without purchasing • Back to Dashboard → /dashboard • View Session History → /dashboard/history
NOTES & RULES	
Rules	• If only one counter (M2 or M3) is at 0, only the add-on option for that module is shown. The other module's sessions remain available and the user is not blocked from using them. • This screen is only accessible to users with at least one completed purchase of Product 3. • On successful add-on purchase, the relevant counter is updated immediately and the user is returned to Screen 06 to continue their journey.
